AQUALOC POLIMER COMPOSITE

Composite Flooring

Polymer Composite, is composed of a limestone core, Virgin PVC powder and stabilizing agent and additives for high performance quality. Polymer Composite flooring is a new generation of floor covering that combines limestone and stabilizers to create an extremely durable core. It is the most durable waterproof vinyl flooring on the market.

It gives a more realistic look and feel of actual wood, stone or ceramic floor and is widely used in a variety of residential and commercial decorations.
